DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 21-28, 30, and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Kay et al. (U.S. Patent No. 5,247,571).

Regarding claims 21-28, 30, and 31, Kay et al. teach a method of operating a virtual private network and a virtual private network in which an originating office communicates with ISCP to serve a call from a line subscribing to an Area Wide Centrex service. The call is completed to a particular destination number using private trunk group depending on routing control information stored in the ISCP data base (column 17, line 40 to column 18, line 39).

Response to Arguments

3. Applicant's arguments filed March 14, 2006 have been fully considered but they are not persuasive. Applicant depends on a passage on the Kay's background of invention and asserts that Kay et al. teaches away from private lines. Examiner respectfully disagrees. It is clearly in Kay's teachings that the Area Wide Centrex routes a call over private facilities using three separate trunk groups. In case that all three trunk groups are busy, the call would overflow to the

public network (column 17, lines 40-49). In conclusion, Kay et al does not teach away from private lines. Therefore, Examiner maintains the rejection.
